

TModel::getAllInitialConcen

TModel::getAllMetabolite
Names

TModel::getMetabolite

```
graph LR; A[TModel::getAllInitialConcen] --> C[TModel::getMetabolite]; B[TModel::getAllMetabolite Names] --> C;
```

The diagram illustrates a mapping or dependency between three methods of a TModel class. On the left, two white rectangular boxes with black borders contain the method names 'TModel::getAllInitialConcen' and 'TModel::getAllMetabolite Names'. On the right, a gray rectangular box with a black border contains the method name 'TModel::getMetabolite'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'getAllInitialConcen' and 'getAllMetabolite Names' are associated with or mapped to 'getMetabolite'.
